

# Technology Partnerships Report — Chikku Robotics

## Table of Contents

- 1. [Overview](#)
- 2. [NVIDIA — Edge AI Computing](#)
- 3. [AWS — Cloud Infrastructure](#)
- 4. [Qualcomm — Wireless & IoT](#)

## 1. Overview

Strategic technology partnerships that enhance our robot capabilities and expand our ecosystem.

| Partner  | Domain               | Partnership Level                   |
|----------|----------------------|-------------------------------------|
| NVIDIA   | Edge AI Computing    | NVIDIA Preferred Partner (Robotics) |
| AWS      | Cloud Infrastructure | AWS Robotics Competency Partner     |
| Qualcomm | Wireless & IoT       | Technology Partner                  |

## 2. NVIDIA — Edge AI Computing

### 2.1 Description

NVIDIA provides the GPU computing platform (**Jetson Orin**) that powers our **Chikku Core ECU** and on-device AI inference. We are an **NVIDIA Preferred Partner** for robotics.

## 2.2 Collaboration

- Co-development of optimized AI models for Jetson platform
- Early access to next-generation edge AI hardware

## 3. AWS (Amazon Web Services) — Cloud Infrastructure

### 3.1 Description

AWS hosts our **Chikku Cloud** fleet management platform. Provides scalable compute, storage, and ML training infrastructure.

### 3.2 Collaboration

- **AWS Robotics Competency Partner**
- Joint go-to-market for manufacturing and logistics customers

## 4. Qualcomm — Wireless & IoT

### 4.1 Description

Qualcomm **5G modules** enable ultra-reliable low-latency communication for our autonomous vehicles and remote teleoperation.

### 4.2 Collaboration

- 5G-enabled robot connectivity
- On-device AI acceleration using Snapdragon platforms
