2. [Partners & Collaborations](#)
3. [Products & Technology](#)
4. [Services & Support](#)
5. [General Information](#)

1. Leadership & Management

1.1 Who founded Chikku Robotics?

Chikku Robotics was founded by **Surender Rangaraju**, who serves as the **Founder & Chairman**. Under his leadership, the company is dedicated to building intelligent robots for a smarter future and making advanced robotics technology approachable and beneficial for society.

1.2 Who is your leadership team?

Chikku Robotics is led by:

- **Surender Rangaraju** — Founder & Chairman: founded the company and leads its vision to build intelligent robots for a smarter future.
- **Mohan** — Director: drives the company's strategic growth and operational excellence.

Together they guide our mission to make advanced robotics technology approachable and beneficial for society.

1.3 Who is Surender Rangaraju?

Surender Rangaraju is the **Founder & Chairman** of Chikku Robotics. He leads the company's vision to build intelligent robots for a smarter future and make advanced technology approachable and beneficial for society.

1.4 Who is Mohan at Chikku Robotics?

Mohan serves as **Director** at Chikku Robotics, helping drive the company's strategic growth and operational excellence in AI and robotics.

1.5 Who are the directors of Chikku Robotics?

Chikku Robotics is led by **Surender Rangaraju** (Founder & Chairman) and **Mohan** (Director). Together they drive the company's vision and strategic growth in AI and robotics.

2. Partners & Collaborations

2.1 Who are your partners?

Chikku Robotics has strategic technology partnerships with industry leaders:

Partner	Domain	Details
NVIDIA	Edge AI Computing	Provides Jetson Orin GPUs for our Chikku Core ECU and on-device AI inference. We are an NVIDIA Preferred Partner for robotics.
AWS (Amazon Web Services)	Cloud Infrastructure	Hosts our Chikku Cloud fleet management platform. We are an AWS Robotics Competency Partner .
Qualcomm	Wireless & IoT	Provides 5G modules for ultra-reliable low-latency communication and on-device AI acceleration using Snapdragon platforms.

2.2 Do you have partnerships with other companies?

Yes! Chikku Robotics partners with **NVIDIA** (Edge AI Computing — Jetson Orin GPUs), **AWS** (Cloud Infrastructure — fleet management), and **Qualcomm** (5G Wireless & IoT). We are an NVIDIA Preferred Partner and AWS Robotics Competency Partner. These collaborations ensure our robots are powered by best-in-class technology.

2.3 Tell me about your partners and collaborations

Chikku Robotics partners with global technology leaders: **NVIDIA** (Edge AI Computing — provides Jetson Orin GPUs for our Chikku Core ECU, we are an NVIDIA Preferred Partner), **AWS** (Cloud Infrastructure — hosts our Chikku Cloud fleet management, we are an AWS Robotics Competency Partner), and **Qualcomm** (Wireless & IoT — 5G modules and Snapdragon AI acceleration). These strategic partnerships enhance our robot capabilities and expand our ecosystem.

3. Products & Technology

3.1 What does Chikku Robotics do?

Chikku Robotics designs and manufactures intelligent robots for a smarter future. We build service robots, collaborative robots (cobots), autonomous vehicles, drones, and the AI software platforms that power them. Our mission is to make advanced robotics technology approachable and beneficial for society.

3.2 What are your featured products?

Chikku Robotics has **three flagship products**:

Product	Description
Chikku Voice AI Kiosk	A smart humanoid kiosk robot with natural real-time voice interaction, deployed in restaurants, hotels, supermarkets, and shopping malls for customer service and navigation. It uses Hybrid RAG architecture combining Vector Search and Knowledge Graph for accurate query understanding.
S-Robot	An autonomous solar panel cleaning robot that maximizes energy absorption by keeping panels dust-free without chemicals or manual labor, suitable for rooftop and utility-scale solar farms.

Product	Description
WatchGuard6S	An AI-integrated 24/7 security and surveillance robot for solar farms, equipped with thermal imaging, high-resolution cameras, and autonomous patrolling to detect intrusions and equipment failures in real time.

3.3 What types of robots do you make?

We manufacture **four main categories**:

1. **Service Robots** — for hospitality, healthcare, and retail
2. **Collaborative Robots (Cobots)** — for manufacturing and assembly
3. **Autonomous Mobile Robots and Vehicles** — for warehousing and logistics
4. **Drone Systems** — for inspection and delivery

We also build our own embedded electronics and sensor modules.

3.4 What AI technologies do you use?

Our **Chikku Brain AI** platform integrates:

- Deep Learning
- Reinforcement Learning
- Computer Vision
- Natural Language Processing
- Generative AI

All AI runs on-device (edge computing) for low latency, privacy, and offline capability.

3.5 Are your robots safe to work alongside humans?

Absolutely. Safety is our highest priority:

- All collaborative robots feature force-limited joints with real-time collision detection
- Mobile robots use 360° LiDAR safety zones
- We comply with international safety standards including **ISO 13482**, **ISO 10218**, **ISO 13849** (up to PL e/SIL 3), and **IEC 61508**

4. Services & Support

4.1 What is Robot-as-a-Service (RaaS)?

RaaS is a subscription model where you pay a monthly fee for robot deployment instead of purchasing hardware upfront. The fee covers the robot hardware, software, maintenance, support, and regular upgrades. This eliminates capital expenditure and reduces deployment risk. RaaS plans are available for all our products.

4.2 How much does a Chikku robot cost?

Pricing varies by model, configuration, and deployment scale. We also offer **Robot-as-a-Service (RaaS)** subscription options with no upfront capital expenditure. Contact our sales team for a customized quote.

4.3 How long does deployment take?

Robot Type	Typical Deployment Timeline
Service Robots	1–2 weeks per site
Cobots	2–4 weeks per cell (including programming)
AMRs	2–4 weeks for facility mapping and integration
Drones	2–3 weeks for site survey and flight path planning

We handle everything from installation to staff training.

4.4 Do you provide training?

Yes! We offer comprehensive training programs:

Program	Duration
Robot Operator Training	2 days
Robot Programming Certification	5 days
AI & Computer Vision Workshop	3 days
Fleet Management Administration	2 days

Program	Duration
Train-the-Trainer Certification	5 days + ongoing support

All programs available on-site or at our training centers.

4.5 What is your warranty and support policy?

All our robots come with a **standard 1-year warranty** covering parts and labor. Extended warranty and premium support plans are available with SLAs ranging from 4-hour response to next-business-day. We maintain spare parts depots globally for fast replacement.

4.6 Do you offer custom robot development?

Yes. For unique requirements that off-the-shelf products cannot address, we offer full-cycle custom robot development — from concept design to prototyping, testing, and production. Our modular platform approach significantly reduces custom development time and cost.

5. General Information

5.1 What does the name Chikku mean?

Chikku is named after the **Chikku fruit** (also known as sapodilla), which is loved across Asia for its natural sweetness. Just like the fruit, our robots are designed to be human-centered, friendly, and trustworthy — seamlessly integrating into daily life.

5.2 Where are you located?

Our headquarters is in **India**. We have offices and R&D labs in **Ho Chi Minh City (Vietnam)** and **Tamil Nadu (India)**. We serve customers globally through our direct sales team and partner network.

5.3 What industries do you serve?

We provide solutions for:

- Smart Manufacturing
- Healthcare
- Warehousing & Logistics

- Smart Cities
- Agriculture
- Hospitality
- Retail

Our robots are deployed in **over 20 countries** across these sectors.

5.4 How do I get started with Chikku Robotics?

The best way to start is with our **Automation Readiness Assessment** — a free consultation where we evaluate your operations, identify automation opportunities, and build a customized roadmap.

Contact us at admin@chikkurobotics.com or visit our website to schedule a consultation.

5.5 How do your robots handle different languages?

Our service robots support natural voice interaction in **30+ languages**, including English, Mandarin, Japanese, Korean, Vietnamese, Thai, Hindi, German, French, Spanish, and Arabic. The **GuideBot G1** also features real-time translation capabilities.
